

# Reliable protection for cables

## LKM cable trunking

The LKM 20030FS and 60100FS trunking types have been tested as a cable-specific installation for the maintenance of the supply of electricity to DIN 4102 Part 1.

E30

E90

- Available in ten different trunking sizes with FS strip galvanised or FSK strip galvanised surfaces and with a pure white plastic coating
- The equipotential bonding between upper and bottom part, as well as between the cable lengths, is ensured without the use of additional connection cables.
- Accessories for vertical, horizontal and ceiling mounting

Trunking	Joint connector	Internal corner	External corner	T piece	Flat angle	End piece	Edge protection ring	Partition	Cable bracket	Trunking clamp

Tested for the maintenance of electrical supply
