## Clamp clip, hammer-head base, 3x single-wire connection

Item no. 1174606

Clip element, bolt and lock plate made of hot-dip galvanised steel, pressure and counter-trough made of polypropylene, halogen-free, light grey RAL 7035. Delivered complete with lock plate and counter-troughs.

The clamp clips 2056/E are used for systematic routing of single-wire cables in rotary current networks. As, with this routing type, the magnetic fields counteract each other, no heating is to be feared and steel clips can be used.

2056/E is suitable for all profile rails of 16–17 mm slot width.

- St** Steel
- FT** Hot-dip galvanised
